PERSONAL PROFILE

Full Stack Developer with a strong foundation in React, TypeScript, and Web Development programming languages, experienced in building scalable web applications, service websites, interactive 3D websites, and AI-integrated platforms. Proven ability to deliver user-centric solutions using Next.js, Vite.js, TailwindCSS, RESTful APIs, NodeJS, and Database Integration. Skilled in both frontend design and backend logic, with a passion for performance, automation, and immersive digital experiences.

EDUCATION

Royal Melbourne Institute Of Technology

Bachelor of Information Technology - 2025

Relevant coursework: Advanced Web Programming; Database Concept; Data Structures & Algorithm; Professional Engineering Experience

SKILLS SUMMARY

- Web Development: Proficient in HTML, CSS, JavaScript, TypeScript, ReactJS, NextJS, ViteJS, TailwindCSS, NodeJS.
- Programming Languages: Moderate foundation in C++, Java, and Python with experience in algorithm development and application logic.
- Databases & Data Handling: Proficient in MySQL and PostgreSQL; familiar with Jupyter Notebook for data manipulation.
- UI/UX & AI Tools: Skilled in applying AI-assisted prompt engineering and design tools to optimize web development processes and elevate UI/UX outcomes.
- 3D & Interactive Media: Skilled in and hands-on experience with Blender, TouchDesigner, and WebGL/Three.js for visual effects and 3D web experiences.
- Remote Interaction: Integrated Open Sound Control (OSC) into web applications for remote and interactive functionalities.

EXPERIENCES

WorldMaxxing- Freelance Full Stack Developer

April 2025 - Now

- Developed a full-stack eVisa platform using Next.js, React, and TypeScript with dynamic multi-step forms for destinations and visa types.
- Implemented complex business logic (group visa rules, port-of-entry, nationality-based fees) and integrated Stripe for secure payments with real-time fee breakdowns.
- Built scalable RESTful APIs and implemented Prisma + PostgreSQL (Neon) for data persistence, user management, and application workflows.
- Designed responsive, accessible UI and contributed to backend logic for fee calculation, data consistency, and robust error handling.
- Product: [WorldMaxxing](#)

Sutygon.com - Freelance Developer

September 2025 - now

CLIENT PAGE

- Built and maintained a full-stack order & invoicing platform for SUTYGON using Next.js, React, TypeScript, Prisma, and PostgreSQL.
 - Developed responsive UI/UX and multi-step order workflows with Zod + react-hook-form validation.
 - Implemented OTP authentication, data persistence, and scalable RESTful APIs for customers, orders, and payments.
 - Created a headless PDF invoicing system with Puppeteer, dynamic templates, QR/Code128 barcodes, and automated payment handling.
- Improved asset optimization, deployment reliability, and invoice workflow integrations (e.g., Zalo tokens).
- Product: [Sutygon Client](#)

CRM PAGE

- Built and maintained a full-stack order & invoicing platform for SUTYGON using Next.js, React, TypeScript, Drizzle ORM, and PostgreSQL.
 - Developed responsive UI and multi-step order workflows with Zod + react-hook-form validation.
 - Implemented phone-centric customer persistence, session management, and scalable RESTful APIs for customers, orders, payments, inventory, and Typesense sync.
 - Created a headless PDF invoicing pipeline with puppeteer-core + @sparticuz/chromium, dynamic templates, QR + Code128 barcode generation, and automated payment history.
- Integrated a mobile camera scanner + Google Cloud Vision OCR for product lookup, secured sensitive fields with AES-256-CBC encryption, and improved asset/ deployment reliability.

Visual Endnode - Freelance Full Stack Developer

September, 2025 - November, 2025

- Rebuilt the website's entire user interface with smooth, modern animations and interactive components.
- Improved overall site performance and loading speed through front-end optimization.
- Optimized media resources to ensure efficient delivery and high-quality user experience.
- Ensured full responsiveness across various devices and screen sizes. Identified and resolved bugs from previous versions to enhance stability and functionality.
- Contributed to the design process and proposed concepts for the new UI. Product: [Visual Ennode](#)

AC3 Studio Vietnam - Developer

March, 2023 - December, 2024

- Developed a remote controller for lighting systems through a web-based interface, enhancing automation and user experience for:
 - Opus Restaurant
 - LOCO Complex
 - Regent Phu Quoc
 - Hue by Light
 - Hue's Festival of Light 2024
 - Created 3D visual effects using programming for Regent Phu Quoc, optimizing interactive visual experiences.
 - Developed 3D interactive websites, incorporating WebGL, Three.js, and modern front-end technologies for immersive user engagement.
- Other Experience.
- Websites deployment on Heroku, ensuring scalability and performance optimization.
 - Built several applications in C++ and Java (logic-based, no GUI), focusing on algorithm development and system efficiency.
